

Chair Grand Rounds

Monday, February 3, 2025 | 12:00PM-1:00PM

Faculty, Residents & Fellows are invited to attend via Zoom.

Planetary Health and Radiology

Dr. Kate Hanneman

Dr. Kate Hanneman, MD, MPH, is an Associate Professor and Vice Chair of Research at the University of Toronto, and a Clinician Scientist at the Toronto General Hospital Research Institute. She is the Deputy Lead for Sustainability at the Joint Department of Medical Imaging.

Dr. Hanneman is the Chair of the RSNA's annual meeting program planning committee, Chair of ISMRM's sustainability advisory committee, Co-Chair of CAR's sustainability working group, and an Associate Editor with Radiology, Radiology: Cardiothoracic Imaging, in the Journal of Cardiovascular Magnetic Resonance, and the Canadian Association of Radiologists Journal. She leads an active research program focused on environmental sustainability and improving health outcomes for patients using cardiac imaging.

Learning objectives

By the end of the session, attendees will be able to:

1. Describe the planetary health framework and adverse health effects of climate change
2. Discuss the environmental impact of radiology
3. Implement actions to promote environmental sustainability in medical imaging
