Details

First Name	Maryse
Last Name	Bouchard
Degree(s)	MD, MS
Institution	The Hospital for Sick Children (Sick Kids Hospital)
Leadership Position(s)	Associate Program Director, Orthopaedic Surgery Residency, University of Toronto
Primary Specialty/Department	Orthopaedic Surgery
Available to Mentor	Faculty and Trainees
Mentorship Status	Mentor
Available to mentor in:	Changing Careers, Committees, Consulting and Industry, CV Help, Diversity, Equity, and Inclusion, Education, Graduate School, Innovation, Intellectual Property, Job Search, Leadership, Making the Most of Toronto, Networking, Salary Negotiation, Starting a Research Lab, Volunteering, Women in Medicine, Work-Life Balance
Bio	<p>I am an assistant professor in the Department of Surgery at the University of Toronto and pediatric orthopaedic surgeon at The Hospital for Sick Children.</p> <p>I did medical school at McGill University and residency in orthopaedics here in Toronto. I also did a Master's through the Surgeon Scientist Program during my residency. I studied the access to orthopaedic medical devices in low income countries.</p> <p>I am fellowship trained in pediatric orthopaedics (Seattle Children's Hospital, Seattle), adult foot and ankle surgery (St-Michael's Hospital, Toronto) and lower limb reconstruction (Royal Children's Hospital, Melbourne).</p> <p>I started my practice at Seattle Children's Hospital in 2015. I started a multi-disciplinary limb reconstruction program, but also specialized in foot and ankle and skeletal dysplasias. In 2019, I moved home to work at Sick Kids. Here, I focus primarily on foot and ankle, but continue working the other areas as well.</p> <p>I have taken a strong interest in promoting equity, diversity and inclusion. I participate in EDI committees at Sick Kids and the University Department of Surgery. I am also an associate program director for the University of Toronto Orthopaedic Surgery Residency Program with a portfolio of EDI and resident wellness.</p> <p>I sit on the board of volunteer organizations that provide training and care in pediatric foot and ankle surgery to children globally.</p> <p>I would be happy to discuss any topics on training, teaching, preparing for and finding jobs, changing jobs, clinical practice development, research, EDI and anything else related to life as a surgeon.</p>
Gender	Female
Research interests	My research focuses on clinical and patient-reported outcomes of pediatric foot and ankle conditions, innovations in orthopaedic medical devices, and equitable access to orthopaedic care. I have built two patient registries and am leading a

Brief description of features:

<https://www.mentoruft.org> This is the first page you see when you login. This page will eventually have all faculty who have enrolled, in Medical Imaging, Orthopedics and General Surgery, and provide the ability to search by research interest, mentorship area, etc., and send messages that go to their registered email inbox. The more of your profile you fill out, the more searchable you will be on the network, and the higher the opportunity to foster connections will be.

Research trainees as part of GTx Imaging Lab Environment: UoFT Experience

<https://www.mentoruft.org/groups/>. This is a page to create interest groups and meet others across the UofT Temerty Medicine system with like-minded interests. Within an interest Group, discussion threads can be created and documents or photos shared amongst group members. Groups can be created and managed by any user with Group participation either open to all, or participation via request/approval. The current groups are demo groups, but feel free to create your own and add your colleagues – they can be private or public.
